

Collection points and specialist retailers

SENS kg products (<25 kg) collecting and transporting

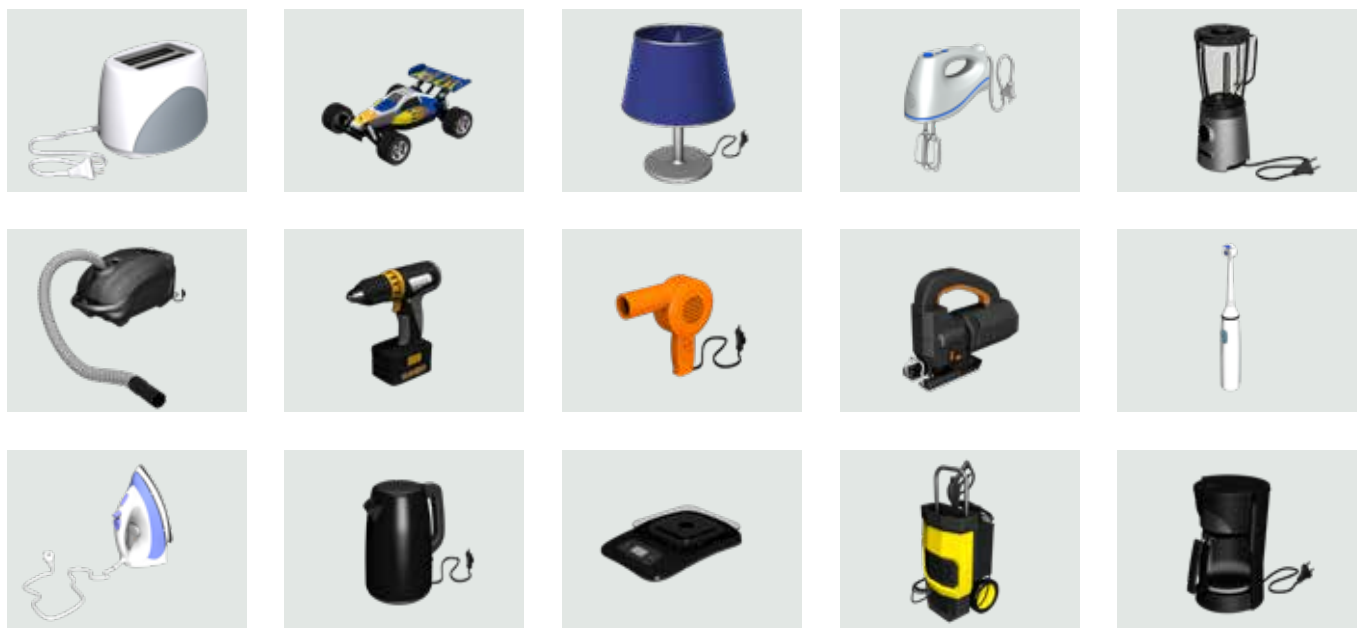

- SENS kg products must not be thrown or handled with the gripper.
- Appliances must be stored protected from the weather. Weather protection refers to fixed constructions such as buildings, roofs and lid containers. The collected material must be protected from weather at the end of the working day.
- The recycling company reserves the right to charge for additional work in the event of poor delivery quality.
- According to SDR/ADR, the sender of waste electrical and electronic equipment with lithium-ion batteries (private and public collection points as well as retailers) is liable for compliance with the regulations and remains responsible until the goods have been unloaded at the recipient's premises.
- SENS kg goods must not be collected, stored or transported as bulk goods, e.g. in skips.
- SENS kg goods and other waste electrical and electronic equipment must be collected and stored separately.

Defective lithium-ion batteries in SENS waste electrical equipment

Obviously defective lithium-ion batteries must be removed and packaged in the steel drums of the INOBAT lithium-ion battery collection. Particular caution is required for model toys such as drones (pouch cell batteries with little external protection).

Correct identification

Without packaging.
No waste.

Classification

SENS kg goods (with and without lithium-ion batteries) are considered other controlled waste. Damage should be avoided.

Containers

Containers must be designed for the corresponding weight. The following can be used:

- EU pallets with four frames.
- Other accepted containers with a maximum volume of 3 m³ and a maximum height of 1.60 m.

Load securing

- The containers must be filled in such a way that the goods cannot fall out.

Labelling of the goods

- The corresponding legal requirements regarding transport apply.
- Containers must be labelled "Lithium batteries for disposal" or "Lithium batteries for recycling".

Transport

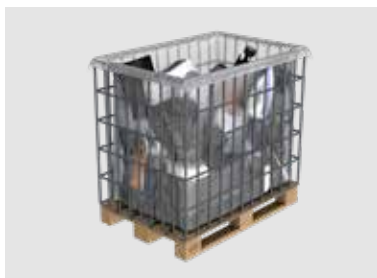

- Loading and unloading is the responsibility of the sender or recipient.
- There must be personnel present to load or unload.
- From 500 kg, loading aids (e.g. forklifts) must be provided by the sender.

Minimum collection quantity

Collection point: 800 kg

Specialist retailers: 400 kg

Accepted containers

Please note: If necessary, the containers must be lined – e.g. with tear-resistant inner film for grid frames or floor coverings for wooden pallets.
